

Section 10

Safety, Health, Environment, and Energy Policy

The Bangchak Petroleum Plc (BCP), a Thai company, with an integrated energy business, ranging from supply sourcing, oil refining to marketing under a business culture that requires it to 'developing sustainable business, while safeguarding environment and society'.

Therefore, BCP considers the safety, health, environment and energy (SHEE) policy to cover all activities, products and services, the key to business success, and is the direct responsibility of all executives and employees to:

- Work safely, creating no undue impact on themselves, related parties, the community and the environment
- Observe all occupational safety, health, environmental and energy-related laws
- Prevent pollution, spills and losses of oil
- Prevent accidents in all aspects
- Use resources namely, energy, water and chemicals to their best value and according to goals.
- Consistently develop safety, health, and environmental management systems.

Executives are to provide adequate resources, which is operationally suitable to achieve goals and targets, and train all employees adequately to ably perform their duties and fulfill their responsibilities while encouraging staff participation in sharing views and revising policies and management systems as well as the OHSAS/TIS 18001. In addition, the management ensures that a sustainability report is prepared to communicate information about the policy on safety, health, environment, and energy-saving together with the Company's performance and activities, as well as the approach in looking after Company stakeholders.
